Spectrometru. Cinci kilograme. Pe Pamant. Aici, mai puțin. Dar tot prea mult.

Pentru asta am venit pe Marte. Praful o sa le acopere intr-o ora.

Oxigen si apa. Restul, pentru cine vine dupa mine.

Le fotografiasem  
acum doua zile.  
Speram sa nu le  
folosesc.

Cu doua minute mai bine decat estimase sistemul. Daca ma misc precis.

SERVO

Dupa unsprezece ani,  
coordonatele 47.2 Nord, 126.4 Est au fost receptionate.  
O echipa de retrieval a ajuns la fata locului.

Lacul disparuse.

Pentru cei care pleaca in necunoscut  
stiind care este pretul.

Voi nu sunteti pierduti.  
Sunteti acolo unde n-a ajuns nimeni inca.

Praful cade peste numele voastre.  
Lumina voastra ramane.
